Granite / Red Cedar Creek Meeting 3-25-92

Cecil Garland Buck Douglas
George Douglas Glen Allred
Lee Sim. John Mann.

minutes approved.
& financial report

Cecil Garland → comm. report.

Tell iced over

2' Weir installed in head of Red Cedar by Douglases.
Granite still measuring based on notch cut in. Weir.
Red Cedar outlet now has a weir plate.
Still looking into power plant on Granite Creek.
should go in this year - Red Cedar next year.
Purchased staff gages → but have not been installed

Glen will put staff gags in before start of irrig season

Douglases have estimated ≈ 216 ft coming into Allreds reservoir.

727 acres. - Allreds
What is total quantity of Allred's right -
~~[illegible]~~ - at what point is Allred's right.
filled so Douglases can start taking water.
Jim Riley and Jesse Anderson have done some work on this.

What about rights on Cottonwood for Douglases. are their Granite rights supplemental to those on Cottonwood or are they seperate? for seperate pieces of ground?

Douglases have one well. (cubing use 20 gpm.)
Cottonwood Creek water.

Alfreds claim Granite Creek is supplemental to those - ~~once~~ their total quantity is met then the water goes back to Alfreds.

Should there be flow ~~[illegible]~~ meas. devices on Cottonwood and well.

John will draft a reply

BMB ← Hydropower company - how do generation rights fit in with all of this

Cecil will start → April 1 Basically every 2 weeks irrig season and every month non-irrig season.

Cecil will send us a bill ~~[illegible]~~ about halfway through the season then we will bill Douglases. Same estimated budget ~~[illegible]~~ salary $10.00/hr. and $25/mile.

Cecil Garland for commissions
