Problem - winter time irrigation (after Nov. 1)
problem

Bill C. telling Ouray Park that the winter stock watering rights were 5 cfs/1000 AC. - this is what they have traditionally done.

BIA would like to have water taken from canal during winter because of winter time flow problems.

Ouray Park saying they get less than half the water in the river they are entitled to.

Their request to the State Engineer - define rights on the river before the start of the storage season.

Bill C. may not understand the rights on the river - he said he will distribute based on written rights

Ouray Park must get the winter water inorder to get through the summer - flow not available.

Public Meeting - 2nd week of December
Try 12th in the evening
letter
all water users.
newspaper?

The certificates seem to indicate 1 cfs/1000 Ac.

A great need to educate each of the canals as to what their rights are - period of use - flows etc. limits of decree or certificate

explanation of relationship between decree and certificates

7:00 pm
In Roosevelt.
Directors from all canal co.
Jr. High or Vocational Center.
