STATE ENGINEER'S OFFICE

Attention: Mr. Wayne D. Criddle
State Engineer

Reference: Water Meters - Cedar City Valley

Gentlemen:

We have your letter of January 26, 1962, advising that some of the Sparling Low Pressure Line Meters furnished for the wells in the Cedar City Valley area are equipped with gallon registers in lieu of acre feet.

Our records reveal that a total of twelve meters have been furnished to dealers in the Cedar City area with gallon registers. Ten of these were purchased by J. Henry Grimshaw of Grimshaw Ditch Lining Co., Cedar City, and two by Henry Wood also of Cedar City. The meters involved are 6" and 8" in size and bear the following numbers:

49224	49225	[illegible]	[illegible]	[illegible]	49229
49230	49242	[illegible]	[illegible]	[illegible]	48770

The gallon registers were furnished at the request of the purchaser.

We are indeed sorry, Mr. Criddle, for the mix-up in registration, however, it would not be a major problem for our Mr. Ed Hendey, to change the gallon registers to acre feet in the field. We would appreciate a verification of the meter numbers together with the location of each. This information will greatly assist Mr. Hendey in making the conversions which would be accomplished on a no-charge basis.

We have taken steps here at our factory to insure that all irrigation meters furnished in Southern Utah will be equipped with acre feet registers.

We trust the foregoing is complete and to your satisfaction. If we can be of further service, please do not hesitate to contact us.

Very truly yours,

HERSEY-SPARLING METER COMPANY

By

J. Earl Hodges
