Water delivered from Mountain Reservoir -
upon demand from water users
Also get water from Pine View Reservoir.
need to shut down Mountain Res. sometimes when too much is coming from Pine View

Trade - springs for 9400 AF in Mountain Res (included 2500 AF in Pine View Res.).
Mayors pond - regulating Res. below Mountain.

Sets of weirs that divide the water according to the percentages in the P.Dist. - (same as in the decree).

Can't put 36 cfs in the system because Brigham City has introduced storm sewer water into canal system.

To Ace by-pass gate North Field & "A" Stream
when open they lose about 4 cfs.
Hired an engineer to study
& Asked judge whether it was legal to open
& to Ace. by-pass or not - judge required all parties to be included. ~~Most~~ Reason for lawsuit.
Parties asked for suit to be dismissed - ignored.

Originally - west side water users - w/o BECWCA water

Peneview original { 1234 AF original - BECWUA
1000 AF - Brigham City. } Part of trade for springs
Later - 1500 - Brigham City }
~~[illegible]~~

PineView water - at the end of the line a lot of fluctuation in the flow.

[Question on re-built main weir - does it divide the water as it used to?

Big question - should bypass be open or not - do the water users get appropriate water when it is.

Water Control Board - meets quarterly
only to tell how water much was been delivered { written contract - agreement
to work things out with the city each year.
All water users on the creek.

Commissioner needed (?) to resolve "personality" problems.
Maybe needed for only a short period of time

Lawsuit is over quantity of water to be delivered
want to deliver 3800 (or 3400) AC FT rather than
9400 AF.
?
