Roosevelt - Utah Box 67.

Mr T H Humpherys State Engineer Dear Sir we are getting along nicely in getting ready for a water commissioner for Montez creek and you will hear from it soon and now i have a question or to i am anxious to know first in regards to Ben Ly Dyes filings. he has two as you know and the one on the Nephy spring for 20 acers. and the flow has increased quite a bit and in case it has increased enough to furnish a sufficant amount to supply both his filings can we compel him to either turn the surplus in the creek

or cut down on the other
filing as eather filing covers
the plain ground he also
has considerabel more land
to water than his filing calls
for and he is trying to hang
on to the surplus so if I
have made it plain please
answer this one. and now
one more question I have
sold the land and water
filing (that I have) and is it necessary
to have the change recorded
in your office if so please
put us on the right way to
go a bout it, yours truely
with kindest regards
and thank for the kirtesy
you have previsly shone
Samuel Snyder
