Mr. J. H. H. Humphreys
Hon State Engineer
State of Utah

Feb 21. 34

Dear Sir.

Acknowledg the Recept of yours of the 14. Thank you.

I will try to explain out the Condition of Mrs Ella Bryant's and also my owne Filings on Montz Creek and why we are asking for Consideration especialy on the west fork of Montz Creek 1st it is the mane Sourse of our Watter suply. I have Filing No 10138

2nd Mrs Bryant ownes the 1st and 3 Filings on the Creek these Filings are Leagley Proven on and to my noladge have not elapsed this fork Runs watter much longer in Dry years than does the East fork. The Dry gulch Irrig. Co. Has no Filing in this gulch their Point of Diversion is on the East fork ~~Several~~ Several miles in an Eastrely direction from the point where they have the west fork damed of dry and Keep it so this dam I am asking them to take out and place in a Head got that Can be Locked for the Diversion of Watter. In the (3) Paragraf of Mr Gallaways Letter he Clames ~~that~~ that in 31 and 33.

No 2

air the onley years we have Bin short of watte I deny that statement and can Prove it. We air short of watter on an avrage of about 3 years out of Five since the Dry ~~Dut~~ Gulch made the new canal from the West fork sum 8 or 10 years ago We have bin trying for a good many years to get a Comisrones on the job. But to no avail until Last year when I Plosed one on myself and I donot Regret the expence.

4th Parragraf of Mr Galaway Letter

The fore Part of this is Pretty well taken of above.

as to my never being Dependent on the west fork above the Reservoy I will say it is our main Earley and Late suply I am of the opinion that the Watter Rights be Maintained as they air ~~as far as~~ and used acoiding to thers Several Classes or Rights

Last Parragraf. Reservoy

as far as the Dry Gulch Irrigation Co Cantraling the West fork of the Creek I Pratest and also Clame it would be Eleagle also Demand that their be a Head Gate

No 3.

Placed in the main Channel of the West fork Under the Dam of the Montez Creek Reservoir Regular Flow of water for our needs Below In Conclusion I would Like to no if you aprove the material used in this Reservoy and if it is in acordince with the State Law as I have a Small Groute of shairs fo stack in the Company.

Yours Very Truley

Sighned } Ira S Bryant
" Ella Bryant
