May 6, 1936

Mr. D. B. Perkins,
Monticello, Utah

Dear Mr. Perkins:

It would appear from your letter of May 4 that you have a slight misunderstanding as to payments required May 1. Such refer only to assessments from water users and not to the Commissioner. In the case of the distribution which you are making, the water users pay directly to you and not to the State Engineer's office. They may make them to you as you request. Payment by May 1, therefore, does not apply.

With respect to the report required of Water Commissioners, you are advised that such report is made at the close or end of the irrigation season and should contain the amounts of water distributed for the year to the respective users, weather conditions and something should also be said as to whether the available water was sufficient, inadequate or otherwise.

The application for bond blank was received, for which I thank you.

Yours very truly,

T. H. Humpherys
STATE ENGINEER
