Mr. Walter Mackerell
Water Commissioner
Beaver, Utah.

RE: Beaver River Distribution
(Right #98 - J.L. Jackson)

Dear Sir:

Mr. Sherrel Carter of Minersville telephoned this office and stated that a locked gate had been placed at the head of his canal and that he was not getting the water to which he is entitled. As you know, this right gives Mr. Carter a right to one second-foot of water to be diverted from a group of springs and if there is not sufficient water in the springs to make the amount to which he is entitled he may divert the difference from Beaver River. As long as there is water flowing into the Rocky Ford Reservoir and water being released from said reservoir, taking into consideration that the first 7,500 acre-feet belongs to Minersville, Mr. Carter should receive his full share of water.

It is understood that Mr. Carter has built his measuring devices as ordered by the State Engineer. Will you therefore immediately check whether or not Mr. Carter is getting a total of one second-foot from all sources and if not give him sufficient out of Beaver River to bring his right to one second-foot.

Very truly yours,

Joseph M. Tracy
STATE ENGINEER.

CC: Sherrel Carter
Minersville, Utah.
