Re: Carlisle Water Company

Dear Ms Odekirk:

This letter is in response to the Measuring Device Notice sent to us March 11, 2009.

We need an extension until fall, if possible. To cure cement and figure out what we need, we can't do that until after the high-water season. We also are making application through NRCS to get some help with the project.

This letter is also inform you that we lost our primary partner with the passing of F. Bennion Redd this week.

Blue Mountain Water has the same situation as we do on the early compliance. We are both okay with the present splitter system for this season. I don't believe that the city can even get to the upper requirement at that elevation.

We all want to comply with the water order. We do appreciate the work that has been done on this matter. Thank you for your consideration in these matters.

Very truly yours,

S. Rigby Wright
