Dear Gerry:

Re: Annual Distribution Report -  
East Fork of the Virgin River

The Division of Water Rights has begun compilation and review of the water usage data which you provided for the 1994 Annual Water Report for the East Fork of the Virgin River Distribution System.

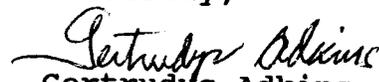

The proper daily operation and accurate record keeping of each distribution system is very important. We rely on the annual report in determining the water use patterns and historical practices in each area of the state. This information is also helpful in resolving conflicts and answering water distribution questions.

We appreciate your timely submission of the annual report and the improvements that you made this year. Your 1994 report data is more understandable, however we would like you to include the following items in the next year report.

1. Table of content
2. A page summarizing the total water diverted by each diversion point in the system.
3. Minutes of the Annual Meeting
4. Financial Report (provided by the Division of Water Rights)
5. Status of diversion structures and measuring devices used in the system (Use form provided on the back of the Daily Discharge Sheet).

As you think of additional ways for improvements or if we can be of help to you, please feel free to contact me at (801)538-7384. Once again, we would like to thank you for your time and dedication in producing reliable water report data.

Sincerely,

  
Gertrudys Adkins, Ph.D  
Distribution Engineer  
Distribution/Adjudication
