April 11, 1994

Harvey Lee Case III, District Chief
 US Geological Survey
 1745 W 1700 S
 Salt Lake City, UT

Dear Lee:

The Central Utah Water Conservancy District has indicated they will no longer fund the operation of the following gaging stations. Therefore, as of the end of the water year, we would like to discontinue funding of these stations.

STATION NUMBER	STATION NAME
09275500	W. Fork Duchesne River Near Hanna
09279100	Rock Creek Near Talmage
09285000	Strawberry River Near Soldier Spring
09286700	Currant Creek Below Dam Near Fruitland
09288395	Starvation Reservoir Near Duchesne
09288400	Strawberry River Below Starvation Reservoir

In addition, the Central Utah Water Conservancy District has agreed to take over the funding for the Duchesne River at Myton, station number 09295000, and Rock Creek near Mountain Home, station number 09279000. They will continue to fund the Duchesne River near Randlett and Sevier River near Hatch gages.

We would like to have these changes effective September 30, 1994. If you have any questions or need additional information, please contact me.

Sincerely,

Jerry D. Olds, P.E.
 Assistant State Engineer
