

Minutes
Little Cottonwood Creek Distribution Committee
Meeting July 15, 2003

Call to order

The regular meeting of the Little Cottonwood Creek Distribution Committee was called to order at 4:00. See attached attendee list.

Reading of Minutes

Minutes of the Little Cottonwood Creek Distribution Committee Meeting held on April 22, 2003 were passed out and read by the members. Minutes were accepted with a modification proposed by Max Reese.

Commissioners Report

Marv Wideberg gave the Commissioners report. Last year the flow was difficult to monitor at Metro due to the Farmer's gate weir elevation. The problem in measuring the flow required additional time to monitor the flow levels. The problem at Farmers Gate was remedied. Farmers Gate weir was lowered four-inches. Will not have extra costs this year..

Reviewed old flows for July 15, for the years 1998, 2000, 2001 and 2002.

Assessments

Jeff Niermeyer outlined the Bell Canyon Aqueduct proposed by Sandy City. The proposed project will diverted out of Bell Canyon and bring water over the Granite Divide. Most of the flow divisions will occur early and late on the shoulders of the Little Cottonwood hydrograph. No action taken by the board.

Next Meeting

The next meeting date was set for October 22, 2003 at 4:00 pm at Murray Power Plant offices.

Meeting adjourned at 5:00 pm.
