

SUMMARY OF LEGAL PROCEEDINGS FOR 1997

During the past year there were five (5) applications which sought to exchange irrigational canal water for well water. All involved canal companies in the south end of the valley and all applications were protested by Pacific Corporation or jointly by the Lower Jordan Water Users and Pacific Corporation. No further actions have occurred with these applications.

Two other applications were submitted by the North Point Canal Company. One for appropriation of an additional 30 cfs water and one for a change of diversion of the Brighton Canal water. Both were protested. A hearing was held July 15, 1997, on which we were represented by counsel. At this time the disposition of these applications are being held by the State Engineer.

No other legal matters were conducted in behalf of the Lower Jordan Water Users Association.

Respectfully submitted,

E. Fred Lewis, Chairman  
January 5, 1998
