WATER RIGHTS  
SALT LAKE

November 2, 1992

Al Trout  
Fish & Wildlife Service  
866 South Main  
Brigham City, UT 84302

Dear Al:

Based on your letter of October 27, 1992, and clarification through personal discussion and phone conversations with you, it was determined that your request was to call on the Bear River to meet management needs at the refuge. The river commissioner has limited natural flow diversion into the Bear River canals to 150.00 cfs and has directed that the remainder of the natural flow be released from Cutler reservoir downstream to meet your request.

Sincerely,

A handwritten signature in black ink, appearing to read 'Robert M. Fotheringham', with a flourish at the end.

Robert M. Fotheringham, P.E.  
Northern Regional Engineer
