To: Milford Distribution System Water Users

Re: Policy Boundary between Milford and Black Rock Districts in the  
Escalante Valley Hydrologic Area (71 Area)

In the spring of 1997, a proposed policy statement clearly defining the boundary between the Milford and Black Rock districts was prepared and distributed to the local press and interested water users. A public hearing was convened in Milford on July 22, 1997 to receive comments from the public. The hearing was advertised in both the Milford and Beaver newspapers. At the conclusion of the hearing, the State Engineer held the record open for a period of 30 days to allow for additional written comments.

Attached is the policy regarding the above-mentioned boundary.

Sincerely,

Robert L. Morgan, P.E.  
State Engineer
