Dear Sir:

This letter is in reference to the opening of Water Commissioner in the Parowan Valley Distribution System. I believe my experience and education would prove to be an asset to this position.

I have been involved in farming and irrigation practices most of my life. With my current employment I have become familiar with the Parowan Valley and most of the farmers in the area. Throughout my professional career I have had to work directly with people in many different capacities both written and verbal, and have been able to have a good professional relationship with them.

I am experienced and comfortable with all the required qualifications listed for this position. Although my resume does not show previous experience with GIS and Arc View, it does show my ability to learn quickly. I am comfortable with computers. It is my understanding that the growing season would be the busy time for this position. These winter months would be ideal to becoming proficient with the software. I have noticed some training is available on the internet.

I would very much enjoy the opportunity to visit with you about filling the position as Water Commissioner. I can be contacted at my home phone (435)477-0159 or cell phone (435)531-3236. I look forward to hearing from you.

Sincerely,

Steve Warr
