

PRICE RIVER DISTRIBUTION SYSTEM

** 1974 ASSESSMENT **

\$. 5,845.00

FORWARD:

The 1974 Assessment of the Price River Distribution System is based upon the Commissioner's Report of Water delivered during 1973, with a minimum assessment of \$ 1.00 to any one assessed water user. Total acre-feet delivered to such users for 1973 totaled 88,761.90 acre-feet of water.

CALCULATION OF ASSESSMENT:

\$ 5,845.00 divided by 88,761.90 equals \$ 0.0658503, cost per acre-foot of water as the over-all factor in determining the \$ 1.00 minimum accounts, and \$ 1.00 divided by \$ 0.0658503 equals 15.19 acre-feet or less in the determination of such users.

There are two such accounts, No. 6 & 14-F which total 9.06 acre-feet of water which is deducted as follows:

	\$ 5,845.00	equals	88,761.90	ac/ft
less	<u>3.00</u>	equals	<u>9.06</u>	ac/ft
	\$ 5,843.00	equals	88,752.84	ac/ft

and therefore:

\$ 5,843.00 divided by 88,752.84 ac/ft of water equals \$ 0.0658346, cost of one pro-rata acre-foot of water, multiplied times that amount of water as reported as having been diverted by each user during 1973 by the water commissioner equals his or her 1974 water assessment.

PROOF:

Two	\$ 1.00	minimum users	equals	2.00
	\$ 0.0658346	times	88,752.84	equals \$ <u>5,843.00</u>

TOTAL 1974 ASSESSMENT \$ 5,845.00
