Re: Treatment Plant - Metering

Dear Phil:

It has come to my attention that there is some question as to your method of measuring the treated water at the plant. I was under the impression that the water was metered, but this is apparently not the case. I feel very strongly that a meter should be installed so that an accurate record can be kept. Therefore, I am requesting that the District install a totalizing meter for this purpose, in the treated water line. I would hope this could be done as soon as possible.

Should you wish to discuss this matter further, please feel free to contact me. As always, your cooperation is appreciated.

Sincerely,

Mark P. Page
Area Engineer
