Subject: Utah Lake Conversion Line / CUWCD's Water Rights in Utah Lake

Dear Bob:

The District requests that its Utah Lake water rights be utilized to lower the Utah Lake Distribution Plan conversion line for the 2001 water year. This will facilitate an earlier and possibly greater conversion of Central Utah Project water stored in Jordanelle or Deer Creek reservoirs. The District's Utah Lake water is comprised of 25,000 acre-feet of primary water under water right No. 57-7624 and 57,073 acre feet of secondary water under water rights 59-14, 59-15 and 59-20.

The District fully intends to utilize these water rights in the future years under Water Right Exchange Application Nos. E3100 and E3101. The exchanges have been approved by your office; however, the District was not in agreement of the conditions placed in the approval. We, therefore, filed a request for reconsideration, which was granted. We are currently awaiting the further outcome as to the status of these rights.

We appreciate working with you. Please contact this office if you have any questions.

Sincerely yours,

Richard L. Tullis, P.E.  
O&M Manager
