Subject: Evaporation Coefficients - Jordanelle Reservoir - Bonneville  
Unit - Central Utah Project, Utah (Evaporation) (Reservoir  
Operation)

Dear Bob:

In response to your inquiry dated April 21, 1993, concerning evaporation coefficients for Jordanelle, we have provided Stan Roberts with a copy of the data listed below. The rates shown are effective evaporation rates in feet per month. Effective evaporation is total evaporation less precipitation. These values were published in the Volume III, May 1988 Regional Director's Supplement to the Bonneville Unit Definitive Plan Report for the Central Utah Project.

<u>Month</u>	<u>Evaporation Rate (ft/mo)</u>
October	0.19
November	0.09
December	0.05
January	0.04
February	0.05
March	0.14
April	0.29
May	0.41
June	0.45
July	0.43
August	0.38
September	0.29

If you have any questions, please contact Lynn Bernhard at 379-1069.

Sincerely,

ACTING FOR

Bruce C. Barrett  
Projects Manager
