Dear Mason:

We are returning your check received as payment on our invoice for the Dynasonic Meter the Division installed on the New Castle Pipe outlet. Please ignore our invoice on this meter for the present time.

The State Engineer determined it was in the division's interest to install the New Castle Pipe to measure the surface water irrigation contribution of the of New Castle Reservoir to the Enterprise Valley. We plan to keep this monitor in place for the near term. If we determine a more pressing need at another location, we may choose to remove it sometime in the future. If New Castle Reservoir Company desires to keep the meter in place and wants to continue to use it, then the meter can be purchased at that time.

We appreciate your cooperation and assistance in facilitating the installation of the meter by digging the hole and subsequently installing the access way manhole. The work done was professional and provides a secure long-term maintenance way for the meter sensors. We also trust that your water master will monitor and keep a record of meter readings. Please notify us if any vandalism occurs on the meter installation. Costs associated with vandalism will be assessed to the company, and may be a cause for removal of the meter and telemetry equipment.

Be advised that the data from the meter can be accessed from the division website by going to:
