RE: Temporary Change Application
No. 82-125

Dear Mr. Roberts:

Reference is made to Temporary Change Application No. 82-125 filed in the name of Utah Power & Light Co., to change the point of diversion of that portion of the waters of the Ontario Drain Tunnel covered thereby for diversion into the Salt Lake Aqueduct for delivery to and treatment in the Utah Valley Water Treatment Plant and then to be delivered to Metropolitan Water District of Orem. Kindly be advised that Metropolitan Water District of Salt Lake City (MWDSL) and Central Utah Water Conservancy District (CUWCD) entered into an Agreement dated December 23, 1976, providing for the use of that segment of the Salt Lake Aqueduct from the intake thereof to its connection with the plant inlet pipeline to the Utah Valley Water Treatment Plant for the conveyance of water to be provided by CUWCD for the use and benefit of CUWCD in accordance with the terms and provisions of that Agreement.

We are advised that on February 11, 1976, CUWCD approved the Petition of Metropolitan Water District of Orem (MWDO) which provided for, among other things, the treatment and delivery to MWDO of water owned by MWDO and we assume that the Ontario Drain Tunnel waters covered by the above Temporary Change Application fall within that category. However, the use of the above segment of the Salt Lake Aqueduct to convey the Ontario Drain Tunnel waters must be by CUWCD pursuant to and in accordance with the MWDSL-CUWCD Agreement, dated December 23, 1976, since MWDSL has no existing agreement with MWDO for its use of the Salt Lake Aqueduct.

In view of the above, MWDSL has no objection to the use of the above segment of the Salt Lake Aqueduct by CUWCD to convey the Ontario Drain Tunnel waters covered by the above Temporary Change Application, provided that such use is made pursuant to and in accordance with the MWDSL-CUWCD Agreement dated December 23, 1976.

We trust that the foregoing will meet with your approval. If you have any questions thereon, kindly advise.
