Dwight Malgrum
P.O. Box #342
Gunnison, Utah 84634

Dear Mr. Malgrum:

Several years ago the gaging station for the Sevier River near Gunnison was moved from your property to a new site. Since this time we have experienced numerous problems with this gaging station because of the instability of the channel and silting problems in this stretch of the river.

This gaging station is perhaps the most important in distributing the waters of the Sevier River system. Over the past several years we have been unable to get dependable measurements at the present location and as a result we would like to move the gaging station back to its original site, which is located on your property. Therefore, I am requesting permission from you to allow us to reinstall this gaging station on your property. I would hope that you realize the importance of this and would cooperate with us.

Please let me know if you are willing to allow us access to your property and if you would like to discuss this matter please feel free to contact me.

Sincerely,

Robert L. Morgan P.E.
State Engineer
