Lee
Dear Mr. ~~Case~~:

During the past several years our River Commissioner on the Sevier River has experienced numerous problems with the Sevier River gaging station near Gunnison. This gage is perhaps one of the most important on the system and we rely very heavily upon it to insure the proper distribution of water on the system.

Therefore, I am requesting assistance from the U.S. Geological Survey in relocating this gaging station from its current site to another location which is acceptable to you and the Commissioner. We are presently working with land owners in the area to determine if we can gain access to their property. We would appreciate any suggestions that you and your staff may have concerning a potential site for this gaging station. When a new site is identified I request assistance from your office in relocating the equipment and with its installation. We would like to have the station relocated and operational before next irrigation season. If you have any questions concerning this request, please feel free to contact me.

Sincerely,

Robert L. Morgan, P.E.
State Engineer
