

STRAWBERRY WATER USERS ASSOCIATION  
ANNUAL STOCKHOLDERS MEETING  
January 25, 1992

At the end of the year 1991, there was 327,012 acre feet of active storage in the enlarged Strawberry Reservoir, as compared with 321,710 acre feet of active storage at the end of the year 1990.

The net inflow of water over evaporation into Strawberry Reservoir in the calendar year 1991 was 35,616 acre feet, compared to 21,014 acre feet of net inflow in 1990.

The total water drawn from storage for irrigation from Strawberry Reservoir in 1991 was 64,040 acre feet, as compared to 82,808 acre feet drawn from storage for irrigation in 1990.

In the calendar year 1991 there was 22,991 acre feet of water delivered through the Strawberry Tunnel to Utah Lake, compared to 25,844 acre feet delivered through the Strawberry Tunnel in the calendar year 1990 as per Memorandum of Understanding between the Strawberry Water Users Association, Central Utah Water Conservancy District, and United States Bureau of Reclamation.

The diversion of water through the Strawberry Aqueduct into Strawberry Reservoir in the calendar year 1991 was 73,782 as compared to 79,959 acre feet in the calendar year 1990.

Water began being diverted through the Strawberry Tunnel from Strawberry Reservoir on June 11, 1991. On September 28, the control gate was closed for the irrigation season 1991.

The Strawberry Tunnel was inspected on September 30, 1991 and 50 steel replacement pieces were put in the roof of the tunnel to replace rotted wood pieces in the repair sections of the tunnel that were done in the years 1967-68 and 1969-70.

The total precipitation at the Spanish Fork Power Plant for the irrigation year 1991 was 20.11 inches, compared to 16.52 inches for the irrigation year 1990.

The average water content in the snow at the two Snotel Sites in Strawberry Valley as of Monday January 6, 1992 was 72% of the past 25 year average, as compared to 58% of average for the same time last year. The average water content in the snow at the two Snotel Sites in Spanish Fork Canyon Monday January 6, 1992 was 65% of the 25 year average as compared to 63% at this time in 1991. As of Monday January 20, 1992, the water content in the snow at the Payson Ranger Station was 67% of the 25 year average compared to 60% of the average last year at this time.

As per agreement between the Strawberry Water Users Association, Central Utah Water Conservancy District, and the Bureau of Reclamation, as of January 1, 1992 the Strawberry Water Users Association has on storage in Strawberry Reservoir:

	19,715 acre feet
April 1, 1992	61,000 acre feet

---

Total	80,715 acre feet
-------	------------------

A summary of all water delivered to the Appropriators in the Spanish Fork River Distribution System in 1991 was:

River Water	34,138.5 acre feet
Strawberry Water	53,916.9 acre feet
CUWCD Water	10,144.5 acre feet

---

Grand Total	98,199.9 acre feet
-------------	--------------------

A breakdown of the water delivered to Appropriators in the Spanish Fork River Distribution System is as follows:
