MEMORANDUM BR07-08

TO: TAC Members

FROM: Jack A. Barnett, Engineer-Manager

SUBJECT: BEAR LAKE ELEVATION

DATE: February 28, 2007

Today I got the regular report from Cyndie Smith regarding flows and water level elevations. I note that Bear Lake has, over three weeks, gone from 5910.67 to 5910.87. That is an increase of almost .07 feet per week. Bear Lake today is only .13 feet below 5911. Can I forecast that Bear Lake will be at 5911 within two weeks? Perhaps, Sue and Jade, you will not need to write your annual letter moving storage to Woodruff Narrows.
