RE: Change Application 81-4503 (a27979)

TO WHOM IT MAY CONCERN:

The undersigned, James M. Park and Tori L. Park, hereby respond to paragraph 3 of your letter dated December 7, 2004 as follows:

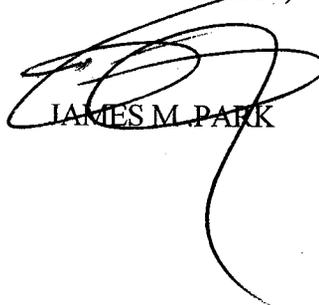

We understand that the water discussed herein is an inferior priority position to the underlying water right relative to all prior rights. Further, we agree that should there be any notice from the State Engineer or an authorized representative instructing that the water shall be shut off, it will be immediately shut off. It is my understanding that the well will be accompanied with a water meter and the water usage is to be brought to the attention of the State Engineer approximately every six (6) months.

In responding to paragraph 4 of the same letter dated December 7, 2004:

As stated above, there will be a water meter on the well accurately measuring the domestic use and will be made available for inspection by the distribution commissioner or any other authorized representative of the State Engineer. It is also agreed that the meter reading shall be reported annually to the distribution commissioner and/or Division of Water Rights and will be filed before January 31 following the year being reported. This will include the information contained in paragraphs a,b,c and d.

Sincerely yours,

THE PARK FIRM, P.C.

JAMES M. PARK
