

DRAFT
March 27, 1995

Mr. Don A. Christiansen
General Manager
Central Utah Water Conservancy District
355 West 1300 South
Orem, Utah 84058-7303

Dear Don:

The State Engineer received your letter dated March 21, 1995, requesting that Central Utah Water Conservancy District's (CUWCD's) Utah Lake storage waters be utilized to lower the system storage conversion line.

At your request, the Interim Utah Lake Distribution Plan was amended on March 22, 1995 to reflect the amended conversion criteria. A copy of the new amendment is attached. The CUWCD is reminded that by utilizing their Utah Lake water to amend the conversion criteria, they have elected not to use any water under their Utah Lake storage rights during the entire 1995 distribution season. If for any reason you did not intend for your March 21, 1995 letter to convey such commitment for the duration of the 1995 season please contact me as soon as possible.

Please contact this office if you have any questions.

Sincerely,

Lee H. Sim, P.E.
Assistant State Engineer
for Distribution

LHS:BLA:

Enclosure (1)

cc: Brad Gardner

March 22, 1995

**AMENDMENT
TO
INTERIM WATER DISTRIBUTION PLAN FOR THE UTAH LAKE DRAINAGE BASIN**

The State Engineer received a request from the Central Utah Water Conservancy District not to deliver water for this season under water right numbers 57-7624, 59-14, 59-15 and 59-20. These water rights are supplied from Utah Lake and/or Jordan River. The water rights represent 25,000 acre-feet of primary rights and 57,073 acre-feet of secondary rights in Utah Lake. With this reduction in the demand on Utah Lake, the criteria of when system storage can be converted to priority storage needs to be modified accordingly. Following are the modifications to Table 3, page 12, lines 8 through 16, inclusive, of the Interim Water Distribution Plan for the Utah Lake Drainage Basin. The River Commissioners are hereby directed to implement these modifications as of March 22, 1995, and they shall be in effect for the remainder of the 1995 distribution season.

	<i>System Storage in Utah Lake and/or Upstream Reservoirs for Remainder of 1994 Distribution Season (Units: acre-feet)</i>
8A <i>March 22</i>	582,742
8B <i>March 22</i>	423,871
9 <i>April 15</i>	420,000
10 <i>May 15</i>	345,000
11 <i>June 15</i>	290,000
12 <i>July 15</i>	255,000
13 <i>August 15</i>	180,000
14 <i>September 15</i>	145,000
15 <i>October 31</i>	125,000*

Note: Values can be interpolated from the table to determine system storage on any particular day.

*The October 31 value will be reduced to 90,000 acre-feet if the Central Utah Water Conservancy District requests water not be delivered during the 1996 distribution season prior to October 31, 1995.
