

August 15, 1961

Mr. Wayne D. Criddle
State Engineer
State Capitol Building
Salt Lake City, Utah

Weber River
1961

Dear Mr. Criddle:

Our company at the present time wishes to do some blanket-
ing and lining on the Smith & Morehouse Dam for the purpose of
sealing off some seeps through the structure. We do not at the
present time anticipate any disturbance of the main dam or any of
the composite constructional parts. We are working through the
A.S.C. Branch of the Soil Conservation Service and would like
your approval to proceed with these minor items.

Your immediate reply will be appreciated.

Yours truly,

Glenn Gibbons

SMITH & MOREHOUSE DAM
