RE: Big Sand Wash Creek Distribution System Water Users

Dear Mr. ^{Bob}Morgan;

Looking back to the lawsuit with the Sand Wash Irrigation Company vs. Dry Gulch Irrigation Company & Moon Lake Water Users Association, Civil No. 5723, it was the opinion of this Association that the State Engineer was asked to appoint a Commissioner for the full Sand Wash Creek distribution system including above and below the Big Sandwash Reservoir.

There are some water users above the Big Sand Wash Reservoir who feel that Bill Christensen has no jurisdiction in that area of the distribution system. The Moon Lake Water Users Association board of directors therefore requests that you include that area in the jurisdiction of the Commissioner if it is not now included.

We would appreciate a letter from you with your decision concerning this matter.

Thank you;

Lynn R Winterton
Manager
