Gentlemen:

No real concerns about the distribution of water on Granite and Red Cedar Creeks have come to our attention over the past couple of years, so it seems that having Jim White act as commissioner as part of his deputy sheriff responsibilities is working out fairly well. It is our understanding that he is willing to continue acting in the commissioner position on that basis without additional compensation.

Since there is no commissioner appointment that needs to be considered nor budget or assessment that needs to be set, we see very little reason to hold an annual meeting this year unless there is a specific issue or issues that need to be addressed by the state engineer.

Enclosed is a copy of the report that we have generated based on the data of the flow from each creek which was provided by Glen Allred from the measuring devices at the regulating pond. Also enclosed is a copy of a general map showing the status of the snow pack and the stream flow forecasts for the western United States. Unfortunately, the map shows no information specifically for your area but to some extent you may be able to determine what to expect from neighboring areas.

If you have specific concerns or issues that need to be addressed with our office, please contact us and we will be glad to schedule a time to meet with you. Unless we hear from you we will not hold an annual meeting this year.

Sincerely,

A handwritten signature in black ink, appearing to read "Lee H. Sim".

Lee H. Sim, P.E.  
Assistant State Engineer for Distribution

cc: John Mann, Regional Engineer  
Jim White, Water Commissioner
