Water Filing No. 3035
95-3035

WATER RIGHTS
SALT LAKE

To Whom it may concern;

I Richard Allsop request that the State Engineer's Office check on any possible misuse of water in the Ransom Creek drainage area that may alter or prohibit the flow of water for said filing. There are several pumping stations in the drainage area upstream from said filing. Flows seem to be more than adequate during West Cache Irrigation season while water is flowing. When West Cache Irrigation has no water drainage flows are very minimal, and we do not receive full water appropriations at those times. Our concern is that other irrigators are backing up, and storing water that should flow down stream to fill our water filing.

We would appreciate clarification on this matter.

Sincerely

Richard C. Allsop

Trenton, Utah 84338
