

REQUEST FOR REGULATION

Pursuant to W.S. 41-3-111, W.S. 41-3-503, and W.S. 41-3-504 revised statutes 1977, I hereby request Regulation of _____ and its tributaries to supply my (our) appropriation of water through the _____ Ditch or Reservoir under Permit No.(s) _____ with priority(s) of _____ until _____ (date).

Signed: _____

Received on _____, 19 _____.

Water Commissioner, Dist. No. _____, Div. No. _____

Request Approved _____
Request Denied _____

Comments: _____

IMPORTANT NOTICE TO APPROPRIATORS

A general requirement for requesting regulation is the maintenance of a satisfactory headgate and measuring device at the diversion point so as to enable the Water Commissioner to determine if the request for regulation has been satisfied. If you do not have an approved headgate and measuring device presently installed, your request for regulation will be subject to review by the Water Commissioner and/or Water Division Superintendent.

The appropriator is obligated to notify the Water Commissioner as nearly as may be possible of the date when water will no longer be used so that proper adjustments may be made to avoid the waste of water.
