BEAVER CREEK SYSTEM -- SUMMIT COUNTY
June 1, 1987

As the system presently stands, there are six water users on West Fork being assessed for 2994.48 acres in Utah and Wyoming. These users are:

Name	Utah	Wyoming	Total
Lyman Grazing Association	1,021.19 acres	141.28 acres	1,162.57 acres
Velma B. O'Neil	191.02 acres	87.00 acres	278.02 acres
Harry Buckley & J. W. Clyde	673.28 acres	121.10 acres	794.38 acres
Alma Evans		476.31 acres	476.31 acres
Alden Olsen		134.80 acres	134.80 acres
Glen Wadsworth		148.40 acres	148.40 acres
Total	1,885.49 acres	1,108.89 acres	2,994.48 acres

Inasmuch as the Wyoming acreage is being assessed via property tax, it is proposed to delete it from the Utah assessment rolls, reducing the assessed property to 1,885.49 acres in Utah. However, since the commissioner regulates and records releases that benefit the Middle and East Fork water users, it is proposed to add these water users and/or Utah acreages. These users are:

Name	Acreage
Gino Foianini	291.37 acres (from East Fork into Gregory Basin)
Lyman Grazing Association	510.00 acres (from East Fork and Middle Fork)
United States Forest Service	19.27 acres (from East Fork to Hole-in-the-Rock Guard Station)

Total	820.64 acres

Handwritten notes: "Middle Forks" above the Lyman Grazing Association row, and "11' water" above the United States Forest Service row.

The proposed new system would involve the three forks of Beaver Creek and 3,815.12 total acres. Utah assessments would cover 2,706.13 Utah acres, and Wyoming taxes would cover 1,108.89 Wyoming acres. Attached is a map for your information.
