Mr. G. H. Humphreys. State Engineer.
Salt Lake City, Utah.

Dear Sir:-

This letter is to certify that the Henrys Fork Water Users Ass. has this day paid me up in full, and are very anxious for me to start work.

I was on Bunt Fork today and water conditions down there is in a bad condition, after the Utah rights are filled there is but a very little water left and I doubt if it ever reaches the Nev. users hardly ever.

In regards to the letter I received from you stating Mr Glandenadler had complained to you about me not giving him any water, I will say it is the first I had heard about him having any water, because he didnot ask me once for water last summer.

I was talking to day with two different parties about him to day and they state he hasnit a water right, said his father helped put the ditch through but he wasnit it for himself but was working for another party, besides the place was abandoned for over twenty years

and was not irrigated or cultivated during that time.

You had better investigate this matter and if you find he has a right I will gladly turn him some water if there is any.

Mr Jensen has been giving all the users a lot of trouble this spring cutting these ditches, so I guess he is looking for trouble.

What procedure should I take to handle him?

Trusting to hear from you soon on this matter.

I am Respt. Your
S. Owen Bullock
