Burnt Fork - Birch Creek

Mr. Lyle Anderson
Burnt Fork - Birch Creek
Water Commissioner
McKinnon, Wyoming

Dear Mr. Anderson:

I am sorry that I did not get this information back to you as quickly as I had promised. Several problems came up around the state that needed personal attention, and I had to delay preparing this information for you.

I hope you still have enough high water to satisfy all your water rights. How is the flow of your creeks holding up? Have you opened Island Lake reservoir yet? I would like to go up there with you sometime in the near future when it is convenient for you. Would you call my office a few days ahead and let me know when you plan to make a trip to the reservoir.

If you have any difficulty in administering the distribution schedule, please let me know where the difficulty lies.

I enjoyed our last visit and I look forward to working with you as our water commissioner on Burnt Fork - Birch Creek.

Sincerely yours,

Clarence E. Erickson, Jr.
Distribution Engineer
