

August 4, 1958

Mr. Louis Stoll  
Burnt Fork Water Commissioner  
McKinnon, Wyoming

Dear Louis:

*Re: Burnt Fork Dist,*

Enclosed is a key to the Burnt Fork Gaging Station for your use. It is my suggestion that you contact the U.S.G.S. employee who runs this station and let him show you their procedure.

A rating table will follow as soon as possible.

Let me know what water is being diverted into Interstate Canal and the Ike Ditch. Also, the amount being released from Beaver Meadow Reservoir.

See you when I can get into your area, probably the last week of August or the first week in September.

Yours very truly,

Donald C. Norseth  
DISTRIBUTION ENGINEER
