Re: Burnt Fork Locality
Water Administration.

Dear Mr. Criddle:

I have your letter of the 23 inst.pertaining to meeting your representatives in the matter of deciding what soet of measuring structures to have installed and setting up schedules for the locality at Burntfork,Wyoming,Thank You;

I assume that Messrs. Norseth and Johnson have proper instruction from you as to what will be best to ask the people to install whether Parshall Flumes,weirs or otherwise such as staff gauges in flumes.

While I, personally, am very much in favor of Parshall Flumes, I doubt that the water users would want to go to such an expense, but no doubt we can work out something that will prove agreeable and yet perform the desired results.

Inshall do my best to meet your boys at Burntfork on the 29Th. of July and if they come through Fort Bridger on that day I would like them to stop in at my place here at Fort Bridger.

Yours most sincerely,

Emil C. Gradert.
Supt. Water Division No.4
