

Mount Carmel, Utah.
January 12, 1960.

Mr. Donald C. Norseth, Assistant Distribution Engineer,
Office of the State Engineer,
Salt Lake City, Utah.

Dear Sir:

In reply to your letter of Dec. 27, 1959, I have contacted the members of our Central Committee and a few of the other water users and all are agreed that we need to have a distribution system set up here by the State Engineer. We will arrange for a meeting of the water users in the church house here in Mt. Carmel at whatever time and date you can arrange to meet with us.

The Central Committee asked me to act as Water Commissioner for the season of 1959. This I did as best I could and so far as I know we got along fairly well considering the extra dry season. But part of this may have been due to the fact that most of the water users were not aware of the fact that I was acting without a commission or any authority from the State Engineer.

Will you send out notices of the time and place and purpose of whatever meeting you want to call from your office? Please let me know when you can meet with us and what I can do to help.

Sincerely,

Bert Gardner Secretary,
Long Valley Water Users
Central Committee.
