RE: Alvey Wash Distribution System, 1977

The distribution records for the Alvey Wash Distribution System in Escalante, Utah have been submitted to the Area Office in Cedar City by Mr. Melvin Alvey, Water Commissioner. The records contain the measurement of the water delivered to this system during the irrigation season of 1977 and this memorandum defines only the total amount assessed against each account. Apparently there were no difficulties in administering the surface water of this system during the period mentioned although it is noted that it was extremely dry during July and August.

The following is a summary of the water delivered, according to the commissioner's records, to the water users on Alvey Wash.
