

ALVEY WASH ~~DISTR~~IBUTION SYSTEM

** 1972 WATER ASSESSMENT **

\$ 700.00

FORWARD:

As per the attached memorandum from Gerald Stoker, Area Engineer, Cedar City Office, the 1972 Water Assessment is to be based upon the percentage of the total acre-feet of water diverted during the year of 1971 to each individual water user as is noted.

Thus, the total amount of water reported diverted by each user is divided by the total over-all amount of water diverted in the amount of 692.70 ac/ft which gives a per-centage of the water diverted. This percentage multiplied times \$ 700.00 gives the individual amount of the 1972 Water Assessment for each water user.

PROOF:

Percentages of water used multiplied times \$ 700.00 equals each his or her 1972 Water Assessment.
