

EAST FORK VIRGIN RIVER DISTRIBUTION SYSTEM

*** 1968 ASSESSMENT ***

\$ 427.50

FORWARD: The water users of the system requested distribution supervision by the State Engineer after many years of self distribution. The first annual meeting with the State Engineer was held Feb. 10, 1960 and since then, such water users had no acre-feet delivery records. It was unanimously agreed that the yearly assessment would be on a pro-rata share of acreage of ground owned by each listed water user with such information to be furnished by the Secretary of the water users to the State Engineer.

BASIS OF ASSESSMENT:

It is determined that the amount of acreage of ground is 1,221.40 acres.

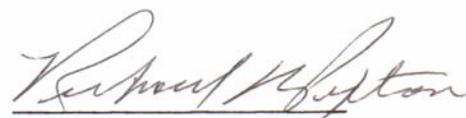

CALCULATION OF ASSESSMENT:

The 1968 Assessment \$ 427.50 divided by 1,221.40 acre of ground equals \$ 0.3500081874, cost of one pro-rata acre of ground multiplied by the listed number of acres owned by each water user equals his or her pro-rata share of the 1968 Assessment.

PROOF:

\$ 0.3500081874 times 1,221.40 acres of ground equals \$ 427.50.
