

EAST FORK OF THE VIRGIN RIVER DISTRIBUTION SYSTEM

1963 ASSESSMENT

** \$ 550.00 **

FORWARD: The water users' of the system requested distribution supervision of the State Engineer after many years of self distribution. The first annual meeting with the State Engineer was held February 10, 1960 and since such water users had no "acre-feet" delivery records it was unanimously agreed that the yearly assessment would be on a pro-rata share of acreage of ground owned by each listed water user with such information to be furnished by the Secretary of the water users to the State Engineer.

BASIS OF ASSESSMENT:

It is determined that the amount of acreage of ground is 1,221.40 acres.

CALCULATION OF ASSESSMENT:

\$ 550.00 divided by 1,221.40 acres of ground equals
\$ 0.4503029320, cost of one pro-rata acre of ground multiplied by
the listed number of acres owned by each water equals his or her
pro-rata share of the 1963 Assessment:

PROOF:

\$ 0.4503029320 times 1,221.40 acres of ground equals \$ 550.00
