

SAN PITCH RIVER DISTRIBUTION SYSTEM

*** 1968 WATER ASSESSMENT ***

\$ 2,500.00

BASIS OF ASSESSMENT:

The Annual Water Assessment is now calculated upon the Commissioner's Annual Report of Water delivered in the previous year (1967) instead of the previous 5-year average.

CALCULATION OF ASSESSMENT:

(1) Total acre-feet of water delivered in 1967 was 29,351.36, as reported by the Commissioner.

(2) \$ 2,500.00 divided by 29,351.36 acre-feet of water equals \$ 0.0851749289, which is the cost of one pro-rata acre-foot of water used during the year of 1967. This multiplied times the amount reported as used by each individual water user equals his or her 1968 Assessment.

PROOF:

\$ 0.0851749289 times 29,351.36 equals \$ 2,500.00
