

SAN PITCH RIVER DISTRIBUTION SYSTEM

\*\*\* 1966 WATER ASSESSMENT \*\*\*

\$ 1,800.00

BASIS OF ASSESSMENT:

Beginning with the 1965 Water Assessment, the annual assessment is based upon the Commissioner's report of water delivered previously, (in the year of 1965 instead of the previous 5-years average as has been done in the past.)

CALCULATION OF THE 1966 WATER ASSESSMENT:

- (1) Total acre-feet of water delivered in 1965: 31,845.50
- (2) \$ 1,800.00 divided by 31,845.50 acre-feet of water equals \$ 0.0565229000, cost of one acre-foot of water used during the year of 1965. This multiplied times the amount reported as used by each individual water user equals his or her 1966 Water Assessment or pro-rata share of the 1966 Water Assessment.
- (3) Proof: \$ 0.0565229000 times 31,845.50 acre-feet equals \$ 1,800.00
