

MILFORD DISTRIBUTION SYSTEM

1961 ASSESSMENT

\$ 1,710.00

BASIS OF ASSESSMENT:

The 1961 assessment is based upon a 3-year average delivery of both pumped and surface water for the years of 1958-1959 and 1960. Eventually this system will be assessed upon a 5-year average as soon as 5 years records are officially obtained by the State Engineer which should be at the conclusion of the water year for 1962.

The Milford Commissioner's report shows the following acre-feet of water (both surface and underground) chargeable on a pro-rata basis to each listed water user:

1960	Acre-feet equals	44,923.00
1959	Acre-feet equals	40,804.00
1958	Acre-feet equals	<u>37,381.00</u>
Three ^{year} Total Equals.....		123,108.00
Three Year Average is		41,036.00

CALCULATION OF ASSESSMENT:

\$ 1,710.00 divided by 41,036.30 Acre-feet of water equals
\$ 0.0416704236 cost of one acre-foot of water, pro-rated, for which
each user must pay multiplied by the number of his/her 3-year
average use.
