Mt. Pleasant May. 21 1932

Mr. Bacon Utah State Engineer
Salt Lake City. Utah.

At the time when Mr Beers was State Engineer We. A.H. Poulsen, Charles Petersen and J. Henry Hasler had an application for high water granted us. from Twin Creek. Some of the officers of the Twin Creek Irrigation Co. protested all they could They have ever since done all they could to beat us out of our water except in 1925 when Mr. Leslie Bowen a state Hydrographer was appointed to deal out our water, which was so satisfactory and we received far more water than we expected to get. He gave me my water from an intake near my land. Because it was next to impossible to get it from the place 1/2 miles up the creek where we made application for the water.

Now this year when the water is plentiful the Irrigation "dictator" L.C. Rasmussen instructs the water master not to give me any water except from place where we applied. That would shut me off from water entirely. It would be far easier for the water master to give me the water where I took for it. than for above where because of so many conflicting ditches, alfalfa fields flumes across the creek are such hindrances.

Would like to know if they can beat me out of the water in that way?

I could buy some high water from a neighbor It would be far easier for the water-master

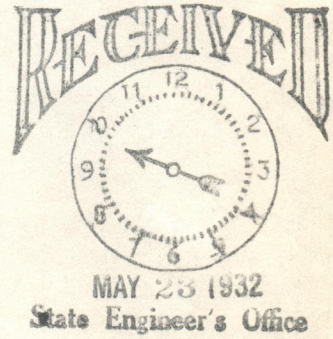
to turn that water out to me than for the water owner, but the "dictator", said absolutely no transfers any where." I promised to pay for every service the water master did for me. Are they right in this second request?

Har not able to pay my taxes last year over $115.00. If I do not get water to raise hay this year I will be again be unable to pay taxes.

Hoping you can give me an answer that will show those tyrants that they cannot beat me out of my water this year.

Very Respectfully

Henry Hafer

Mt. Pleasant. Utah,


P.S. L.C. Rasmussen is Sec. of the Twin Creek Irrigation Co. "Dictator" and every thing. If you want to write to him. H.H.
