Manila. April 21. 1932.

State Engineers Office.

Gentlemen.

Herewith I am including a drowing to give to you the proper understanding about the conditions which exist and are purposly arranged from several partys, Tinter and Rasmussen to dry me up, beat me out of my Waterstock and the Farm itself. Since I am building the new Ditch, Tinter has hyred an other party to goin them, and prevent me from getting Water through the new Ditch in preventing a deviding box to be instal-led from the Sheep Creek Irragation Company an Incorporation ahead of my Ditch. Law is not concidered in Daggett County at all in this repect

They have done untill this year, anything the wanted to do, to beat me out of my Rights. I have tryed various ways of getting Water to my Farm, but all turned out to be a failure, because those party's are the Directors of the Sheep Creek Irrigation Company and have no concideration for anything else, but to dry me up, beat me out of my Waterstock and Farm. This is the sixt year that I have to dry Farm, no Crops can be raised without water, everything is burning up and is a Failure, my Family is compelled to go hungry on that account. Next year is the seventh year, that I did not had water on the Farm, according to Law, I will loose my Water Rights for this Farm, this is what those party's are working for, to accomplish that end of it.

Now I am asking for assistance from the State Engineer, to investigate and find out for him self, so that State Law will be inforced up on the Sheep Creek Irrigation Company to obey Law. Waterstock has been transfered from one Farm to another, and from the other Valley to this Valley, which is contairy to State Law and purposely done to drayne up. The Wastewater under this system is such a large amount that it would food away my Farm several times, and other Farms are conver.. ted in to swamps, but the will not let any water come my way. My Farm is the most productive one in the whole Valley and it has been proven in the year 1925. when I had water to irrigate. Then all the water was all in one Ditch and now it is

de[illegible]ded in two, and now [illegible]ven in three ditches and now I am prevented from getting Water because the Company refuse to install a divider. My Water stock is paid for in full ever since and be[illegible]for 1925. I can not see why Law can not compell those partys and the Irriga. tion Company be obeys the Water Laws. If any farther informations are desired please let me know and I will supply them. Hoping that you would be as kindly and assist me in getting my Water Rights inforced for my Farm I remain yours very truly.

William Grothe

Manila. Utah.

P.S. If Law have not got the power to do so, then I am compelled to estab. lish my Rights, through the force of a gun and shot or kill the guilty ones.
