Mr. John H. Clark, Engineer
Panguitch, Utah

Dear Sir: REL: BOULDER CREEK DISTRIBUTION

Mr. Francis Lyman of Boulder, Utah, has forwarded to this office a blueprint of a map showing the proposed reservoirs, existing and proposed canals, and lands to be irrigated under the Boulder Irrigation and Reservoir Company's system. The accompanying letter from Mr. Lyman stated that this office should have of record a blueprint of this map, since it was prepared in connection with Applications Nos. 11103, 11104, 11105, and 11106. I have, however, been unable to locate this blueprint.

Mr. Lyman makes reference to this map in a Water Commissioner's report on Boulder creek for 1937. I am therefore desirous of obtaining a blueprint of same. I am wondering, therefore, if you will have prepared two blueprints from your original tracing and forward them to this office. I will be glad to compensate you for any charges involved.

Yours very truly,

T. H. Humpherys
STATE ENGINEER
