Boulder Utah. Jan 19/1932

State Engineer.
Salt Lake City, Ut.

Dear Sir:

From the following facts, as closely as I can write them would you please tell me who, in your opinion this water belongs too.

Some seventeen or eighteen years ago approximiately one half second foot of water was taken out of the deer creek system and put on the north East corner of my place to be used for culinery purposes, as this is where my home, correls garden and orchards are, and for the irrigating of about five or six acres of land.

This water has never been off the land during this entire time only for about two months each year the coldest freezing weather when it was impossible to keep it in the ditch. No one else has ever used this water during this period of time and no other water has ever been used on this land.

I have never filed on this water but would like very much to do so were it possible for me to do so

Should this water belong to Mr. John King who now claims two and seventy five hundredth cubic feet of water from the

west and center deer creeks, and who is now getting this amount.

Does it belong to W. A. Wilson, Annie C. Hansen and Bert Peters who claim six cubic feet of water taken from East Deer creek, West Deer creek and Center Deer creek?

I might State that I am the same Bert Peters mentioned in the filing above but the water in question irrigates a different farm.

I could think of no place to go to get better information than from you and any you can give me will be very much appreciated.

Trusting I have made the matter clear to you and that I may hear from you soon

I remain yours very truly

Mr. Bert Peters.
